Brightwood, suffered from a very painful accident about 6 o'clock last night, while assisting the engineer at Dr. William H. Johnson's Brightwood electric light plant to locate a hot box, and as a result his right hand and wrist were badly lacerated. The engine, which is a new one, was labor-

through between the wheel and the cylinder and was wedged between the two in a space about an inch wide. The engine was immediately stopped and Dr. Johnson dressed the wounded member. No bones were broken, but it is remarkable that the hand was not severed from the arm. George Wulle, sr., employed upon the Big Four repair tracks at Brightwood, was struck in the eye by a piece of an old draw-bar key which he was chipping from a drawbar, yesterday morning, and it is feared that the sight of the eyes will be destroyed. Drs. Brown and Marsee were both summoned and rendered the injured man as much relief as was possible.

The spontaneity with which this query appears on the street after an Indianapolis ball game is a homeopathic dose compared to the form the query took on the street last night. The motorman on a north-bound car leaving the corner of Pennsylvania and market streets last night actually wouldn't budge his brake till somebody told him that "Tillie won." CHICAGO, Jan. 23.-Bicycle manufacturers took possession of the Coliseum tonight to hold undisputed sway for one week, At 8 o'clock the doors of the great building were thrown open to admit the crowd which came to get a first view of the bicycles which will be ridden during the year 1897. They were well rewarded for their trouble, for they saw the greatest cycle show ever held here. Despite the stormy weather there was a large crowd resent and the show started off under the most favorable auspices. It has been a gigantic task to drape the expanse of roof covering the long girders with bunting attractively festooned and looped back with Chinese lanterns inclosing an incandescent light at each festoon and it has been a greater task to cover the bare railings along the aisles and placed across the different sections forming 600 booths, in which are exhibited every portion of a bicycle, from the smallest set screw to the complete wheel and an infinite line of saddles, tires, hubs, balls, chains, handlebars bells and everything else which could in any way be advantageously attached to a bicycle. Nearly all the exhibits were in place when the doors were opened to-night.

The close of the bicycle race at Tomlinson Hall last night was on the Ben-Hur scale, with women encased in tights, riding noiseless steeds, instead of the lumbering of chariots and clattering of Arab horses. Several thousand spectators, dancing holes in the thin-bottomed chairs of Tomlinson Hall, or jabbing elbows into the faces of their neighbors to clear a view of the track, all cheering and shouting a babel of "Tillie," 'Dottie," and other familiar names, made a scene of excitement not unworthy of comparison with the scene of some thrilling "Tillie," the blonde Swede, with faint blue
